**Our special USCIS 693 process is designed to greatly minimize your expense and get your paperwork done as quickly and efficiently as possible.**

**VISIT # 1** Call us and schedule a visit with us. Please bring your passport and any vaccination records you might have.

Blood test for HIV, RPR and Varicella antibodies (Chicken Pox)  
Skin test for TB is placed on your arm (PPD)  
USCIS medical history and physical exam are completed.  
We complete as much paperwork as possible

**VISIT # 2** is two or three days later.

Your skin test for TB (PPD) will be examined.  
If PPD is negative = Done (no chest x-ray needed)  
If PPD is positive = chest x-ray is required

We determine which vaccines are needed based on your blood test results and vaccine records. Most adults need an MMR (measles mumps rubella) and a TDAP (tetanus, diphtheria & pertussis)

**get a chest X-ray if needed      get any vaccinations you need**

**FAX all your results to our office at FAX # 646 349 5328**

**STEP # 3** You or a designate can pick up your completed sealed USCIS envelope at our office. Or, if you prefer, for a fee of \$20.00 your sealed envelope can be delivered directly to you by FED EX or by bike messenger.

**Congratulations! And thank you for allowing us to help you with the adjustment of status USCIS process.**
